Who We Are

How Can Dawsongroup tcs Support Your Business?

Think about how your business is limited by space and movement or restricted by the demands of environmental controls, like temperature, humidity, and cleanrooms.

Now ask yourself how your organisation could improve with fast, affordable, and provisional space and movement solutions.

The answer can be found with Dawsongroup tcs.

Dawsongroup

Dawsongroup is a community of industry-leading business-to-business asset hire and funding companies. The Group provides specialist commercial vehicles and temperature-controlled solutions, and our assets represent more than thirty thousand supply chain links across every market.

Dawsongroup tcs, a subsidiary of Dawsongroup, was founded in 1990 to provide the market with high-quality, hireable, modular and configurable temperature control solutions.

We emphasise space optimisation, seamless movement, and streamlined processes to empower business operations and opportunities without extensive lead times or heavy capital investment.

Our Smarter Asset Strategy offers the right solution for your needs without risking your capital. We remain at the forefront of innovation, ensuring our customers maintain agility in an ever-changing marketplace.

Dawsongroup tcs

Why Dawsongroup tcs?

At Dawsongroup tcs, we are your strategic partners. We develop an in-depth understanding of your needs and challenges through our assessments, conversations and site visits. Our industry expertise and consultative approach are the key to designing systems tailored to your business.

Our solutions deliver short- and long-term cost savings, operational improvements, refined temperature consistency, enhanced labour efficiency and stock rotation, and boosted logistic process flow.

Operational Across the Globe

Dawsongroup tcs is continuously adapting and evolving our offerings to meet the ever-changing needs of the global supply chain, helping businesses thrive in an increasingly competitive landscape.

Our extensive network spans the UK, New Zealand, the USA, and Europe, providing localised support and expertise around the globe, guaranteeing that each solution is aligned with regional regulations and market demands.

The Temp°store Solutions

The Temp°store is a versatile, inflatable solution for businesses requiring temporary, easy-to-install storage or space with temperature control. Designed and manufactured in the UK by the in-house team at Dawsongroup tectoniks, the Temp°store is made from premium quality, fire-retardant composite textiles to withstand the elements, ensuring reliable and long-lasting performance. This incredible product was the recipient of the Queen's Award for Enterprise for Innovation 2022.

The Temp°store is available in a range of modular sizes and temperature controls. The modular design of the Temp°store enables it to be easily transported, rapidly deployed and adapted to various needs. Wide, ground-level doors provide easy access for staff and equipment, enabling faster and more efficient loading and unloading than to traditional refrigerated solutions.

From start to finish, the Temp°store can be installed in any location, internally or externally, within a day. It can be as temporary or permanent as you need it to be, and if you need the space back, it can be easily moved to a new position. Built with compliance, energy efficiency and cost optimisation in mind, it is perfect for product storage or as an event venue.

Range of Temp°store

Our Temp°store range includes a selection of portable storage and temperature-control solutions, designed to bring flexibility and versatility to different industry sectors.

Connect

The Temp°store 10's unique and patented design takes only one hour to deploy. It is a temperature-controlled, inflatable building, incorporating an integrated floor and packaging solution with a temperature range of -18°C to +14°C. It enables rapid deployment in instances of crisis, where cold storage is critical, to help prevent some of the two million avoidable deaths caused by lack of cold storage. Whether responding to emergencies or supporting ongoing healthcare efforts, it ensures that lifesaving supplies remain viable, offering a swift, portable, and reliable solution for cold chain logistics. Wherever the need is in the world, the Temp°store can be transported by air, road, rail, or sea.

General Specifications

Capacity	10m ²
Internal dimensions	3.05m (w) x 3.61m (d) x 2.58m (h)
External dimensions	4.00m (w) x 3.61m (d) x 3.10m (h)
Interior Temperature Range	+2°C to +8°C
Ambient Storage	-2°C to +50°C
Deployment Time	1 hour
Scalability	Stand-alone single unit

*Option for dual fridge system with changeover panel is available for request.

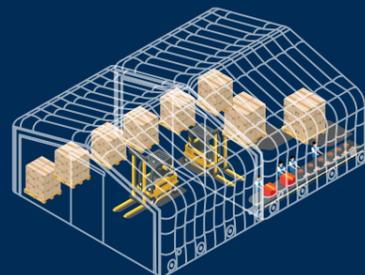

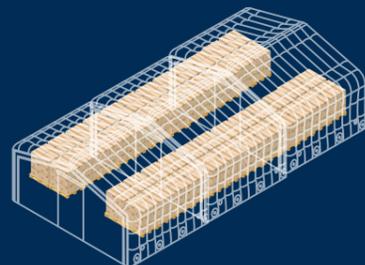

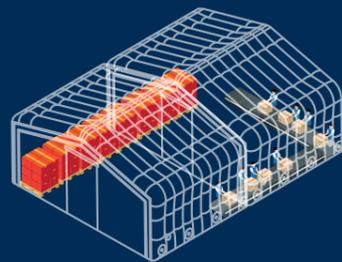

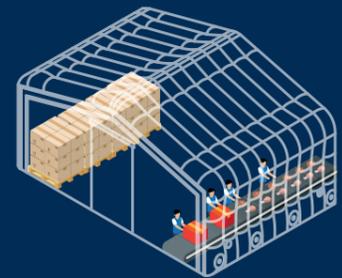

“It just makes everything so much easier with Temp°store.”
Peter Cro

The Temp°store 18 and 26

The Temp°store 18 and 26 are an inflatable temperature-controlled space, which can be configured as a single, double or triple unit, with an internal floor area ranging from 18m² to 72m².

The units can inflate in just four hours and can be down to temperature in less than 90 minutes, holding a consistent temperature between -18°C and +18°C. The unique, insulating floor protects the ground beneath from the impact of low storage temperatures. Additionally, the accessible door is designed to lock, providing an additional layer of security and, when combined with the insulated curtain it keeps the cold in, energy efficiency.

The Temp°store is ideal for ambient, chilled and freeze preparation and production. It can be installed within 24 hours to accommodate peak demands.

Two Temp°store 18 or 26 freezers provide up to 52m² of storage, ensuring product quality while maintaining plenty of space for packaging.

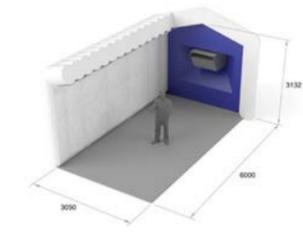

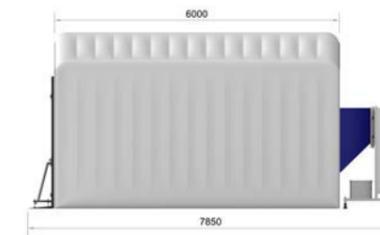

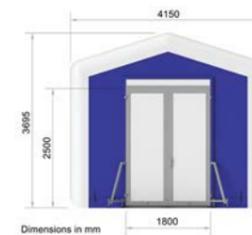

Three Temp°store 18 or 26 provide up to 78m² of chilled or ambient space to meet your needs. No groundwork is necessary, and it can be inflated inside or outside of your building.

With its wide doorway and spacious interior, forklifts can work inside any Temp°store 26 configurations.

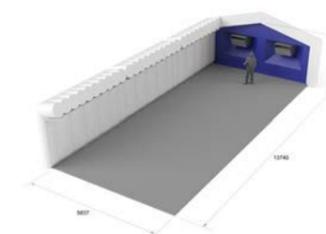

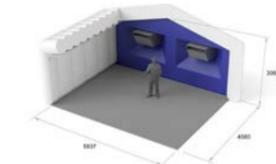

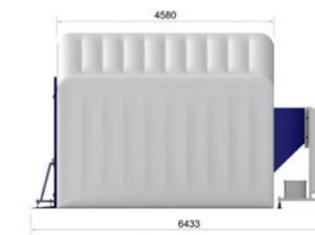

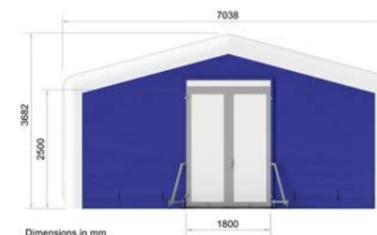

General Specifications

	Temp°store 18	Temp°store 26
Capacity	18m ²	26m ²
Internal dimensions	3.05m (w) x 6.00m (d) x 3.08m (h)	5.84m (w) x 4.58m (d) x 3.08m (h)
External dimensions	4.15m (w) x 6.00m (d) x 3.70 (h)	7.04m (w) x 4.58m (d) x 3.68m (h)

“We run your units at temperature control because the factory isn’t temperature controlled.”
Mick Day

The Temp°store 80 and 100

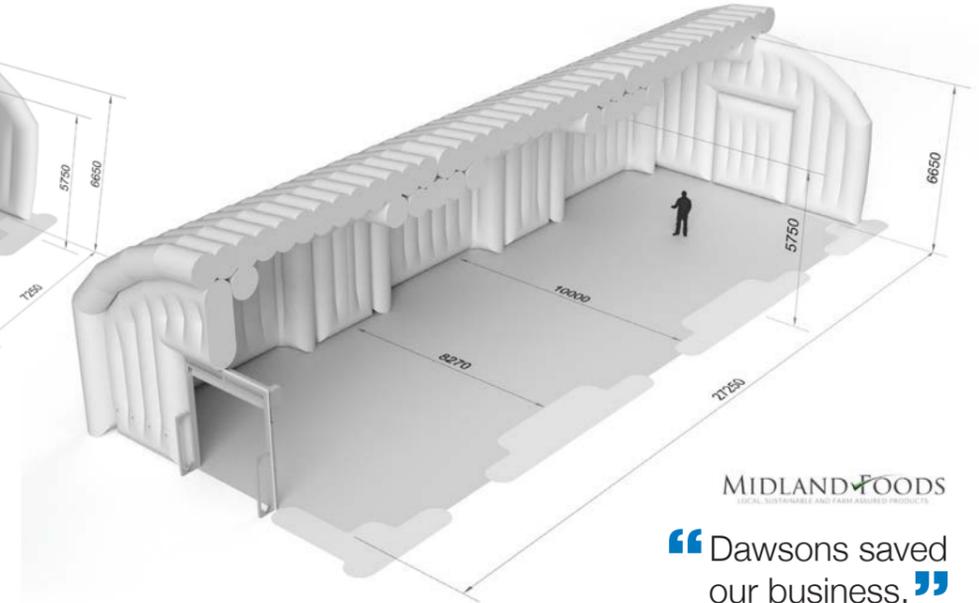

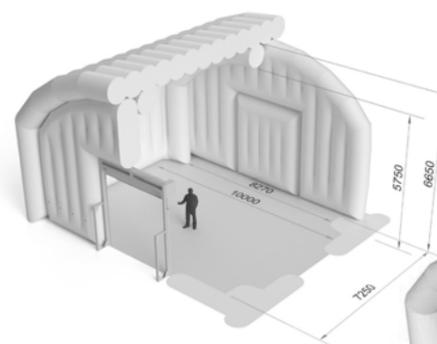

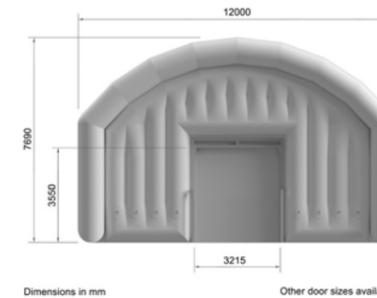

Temp°store 80 and 100 structures are extremely versatile and ideal for any purpose. They are simple, robust, and quick to install, as they do not require the groundwork or construction time that traditional temporary buildings need. They are available in various widths and lengths to meet requirements, and the inflatable walls provide greater sound and temperature insulation.

Temp°store 80 and 100 structures can be combined with air handling units from Dawsongroup Process and Climate Control (DGPCC) and a specially designed insulated liner to maintain the internal temperature.

These inflatable structures create large-scale, temporary or semi-permanent spaces, ideal for protecting sensitive products from external conditions like heat from direct sunlight. With the ability to create a controlled environment and fast deployment, the Temp°store is an efficient solution for handling sudden increases in demand without requiring long-term construction.

General Specifications

	Temp°store 80	Temp°store 100
Capacity	80m ²	100m ²
Internal dimensions	10.00m (w) x 10.00m (d) x 6.65m (h)	12.50m (w) x 10.00m (d) x 7.25m (h)
External dimensions	12.00m (w) x 10.00m (d) x 7.70 (h)	15.00m (w) x 10.00m (d) x 8.55m (h)

The Temp°store Event Structures

Dawsongroup tcs offers unmatched expertise in temperature-controlled solutions for the events and festival industries. The Temp°store modular system is distinguished by its functionality and its customisation. We offer a refreshing alternative to conventional tents and marquees and can be deployed in a fraction of the time.

The Temp°store's fire-retardant composite textile has a tensile strength of 5.5 tons per meter, ensuring high durability. The unique welding construction, sophisticated pressure control and anchoring systems ensure the event structure maintains performance under any condition, providing maximum safety and comfort. Whether you are hosting a small-scale event or a large one, the Temp°store offers unmatched flexibility to fulfil your event needs. The Temp°store is highly mobile, transportable, and can be reused across multiple events.

Temp°store Event Structures are also designed with sustainability in mind. It leaves no environmental footprint, with minimal onsite disruption and no lasting impact on the site.

General Specifications

Temp°store Event Structures	
Internal dimensions	(w) 12.50m x (d) 10.00m x (h) from 3.8m to 7.2m
External dimensions	(w) 15.00m x (d) 10.00m x (h) from 7.7m to 8.5m
Interior Temperature Range	Ambient to +4°C (combine with DGPC's air handling units)

“There's no one better I can find. Every year, it's a guarantee we'll use you.”
Ashley Griffiths

Comprehensive End-to-End Solutions

We support every aspect of your supply chain, not just cold storage. As part of the larger Dawsongroup family, we offer logistics and asset management solutions beyond temperature-controlled storage, including transport, fleet management, material handling, energy solutions, process cooling, climate control, and finance support.

This integrated approach enables us to deliver unmatched value, combining cold chain expertise with Dawsongroup's broad capabilities, bringing all your needs under one umbrella. Whether you need to scale up, reduce costs, or improve efficiency, we are equipped to provide the right solution at every stage, keeping your business competitive and resilient. By minimising your moving parts, we can ensure quick and stress-free agility, whatever the fast-paced world of logistics might throw at you.

Contact us to learn how we can optimise your entire cold and supply chain for long-term success.
